

Mavis Beacon Teaches Typing

Personal Profile

User Name: AECleanCodes

Current Date: 06/22/2021

Overview

AECleanCodes - According to your information since you began typing on 06/06/21, you have completed 6 hour(s) and 24 minute(s) of typing. I have been able to determine from your quizzes and tests that you have not yet achieved your initial typing goal of 40 WPM. In your initial typing test you typed 13 AWPM. You are currently typing 9 WPM with 95% accuracy, or 9 AWPM. You remain in the intermediate class and you are at 22% of your goal. Since you have not reached your goal yet, try practicing each day at the same time. You will reach your goal!

Accomplishments

According to the analysis of your typing performance, you are currently typing at the intermediate level. You have invested a total of 6 hour(s) and 24 minute(s) since registering for class. The graph also indicates that you have completed 58 quizze(s) and 0 speed test(s). Regular verification of this information will help understand your progress.

Diagnostics

AECleanCodes, the keyboard graph displays the keys you are having trouble with, those you need to work on a little longer and those you have mastered. Examine this chart carefully and keep this information in mind when completing your typing lessons. You seem to be having problems with some of the following character(s): ",p,v,x,',,,e,o,g

And finally, you seemed to be experiencing Wrong Column problem(s). The character(s) ",p,v,x,',,, seem to be giving you the most difficulty. This problem occurs when you are typing a letter in the correct row, but in the wrong vertical column. For example, typing the letter "q" when an "a" should have been hit. A solution might be to try concentrating and visualize on hitting each key. Your best learning will happen when you are challenged so don't give up!
